**Build Options:**  
 Bi fold for side hinged.  
 Euro-locking for side hinged.

### CANOPY GEAR

Canopy gear operates with overhead torsion spring and vertical tracks fixed directly to the frame. Therefore there are no tracks suspended from the ceiling and full drive through clearance is gained between the frame. Multipoint locking with secure Euro - profile cylinder and user friendly T handle, centred in the top third of the door.

### RETRACTABLE GEAR

Retractable gear offers smooth operation and balance and is ideal for electric automation. Multipoint locking with secure Euro-profile cylinder and user friendly T handle, centred in the bottom third of the door. Wicket doors are an optional extra available for the Rivington design, suitable for manual operation only.

### SIDE HINGED

Available as centre or off centre split. The access door has a brass effect night latch and can be positioned to either side. Centre split doors are suitable for electric automation, whilst for manual doors; stays are available to secure opened doors. Other optional extras include Euro lock with lock bars, Brass or Satin steel hinges, Bi- folding door.

### FRAME DETAIL

All doors up to 9' (2743) wide are available with pre-fitted steel frame. The majority of operating gear is factory fitted for quick installation. Steel frames are finished in one of our powder coat colours and offer a strong, low maintenance alternative to timber.

Frame dimension-

Sides- 60mm (23/8') wide

Head = 56mm (21/4') deep.

## SPECIFICATION

### SIDE HINGED DOORS

Unless specified otherwise at the time of order, doors will be made as follows:-

First opening door to be on right as viewed from outside.

Certain sizes will require the use of infill panels - see table.

Side hinged doors **opening out only** will have draught seal to sides and top internally.

Clear opening of steel frame will be 40mm less in width and 20mm less in height than frame opening size. (Please note the depth of door panel may also reduce clear opening if the opening travel of door leaf is restricted.)

Lock mechanism will be Roller Bolt Night Latch.

Tower bolts will be fitted to top and bottom of 2nd leaf.

### PERSONNEL DOORS

Unless specified otherwise at the time of order, doors will be made as follows:-

Doors will open out with hinges on the left hand side as viewed from outside.

Certain sizes will require the use of infill panels - see table.

Lock mechanism will be Roller Bolt Night Latch.

### RETRACTABLE DOORS

Locking will be 2 point slam latch with euro profile lock. Handle in the bottom third of the door panel.

Drive through clearance will be reduced by mechanism - measurements can be calculated once door sizes are known.

### CANOPY DOORS

Locking will be 3 point slam latch with euro profile lock. Handle in the top third of the door panel.

In fully open position top of door will reach 52" into the garage from the back of the frame.

## SELECT STEEL WARRANTY

Select Garage Doors Ltd provides a 5-year limited warranty against manufacturing defects from date of purchase.

In the event of a claim, please contact the distributor who originally supplied the product, who will then supply details of the claim along with the proof of purchase to Select garage doors Ltd. Valid claims will be repaired or replaced at our discretion. We do not accept costs for dismantling and installation nor for carriage.

Subject to the following conditions:

### Operating gear

All products must be installed in accordance with installation instructions.

Moving parts should be lubricated regularly to ensure smooth operation. This should occur at least bi-annually along with a visual inspection of any parts subject to wear. If wear is detected you must contact your supplier immediately. A qualified engineer must inspect and carry out repairs/replacements as necessary. **DO NOT ATTEMPT THIS YOURSELF, AS THIS COULD BE POTENTIALLY DANGEROUS.**

### Appearance

During the manufacturing process it is inevitable that some distortion in the panels will occur. The factory applied finish may be subject to minor blemishes or slight inconsistencies.

A visual inspection should be carried out in natural daylight (not direct sunlight), from a distance of 3 metres to view the overall appearance.

Any minor marks, distortions, indentations, scuffs or blemishes will not be covered by warranty.

### Finish Warranty: -

Primed steel doors must receive a suitable exterior topcoat immediately after installation, in accordance with manufacturer's instructions. It is recommended a matt or semi gloss is used, as high gloss will exaggerate any distortions. This coating is not covered by warranty.

Factory finished powder coating is covered for FIVE years. Minor chips or scratches which result in cosmetic or surface corrosion are not covered.

Laminate wood grain finish is covered for 5 years.

Surfaces must be freely exposed to washing by rainfall and kept clear of bird droppings, accumulated dirt and debris.

The door and frame should be kept free from impact damage, scratches and other surface abrasions. Damage, corrosion or discolouration caused by contact with an excessively salty atmosphere, abnormal elements within the building or from pollution, chemicals, or caustic substances is excluded from warranty.

The company reserves the right to make alterations in design and manufacture as are deemed necessary without notification.

### Note:

Our products are not suitable for use as gates on external installations.
